

WeightService.java

```
1 package webapplication.rest;
2
3 import javax.ws.rs.GET;
12
13
14 @Path("/weightservice")
15 public class WeightService {
16
17     @GET
18     @Path("/startweight")
19     public void startWeight(){
20         ISocketController socketHandler = new SocketController();
21         IWeightInterfaceController weightController = new WeightInterfaceControllerGUI();
22         //Injecting socket and uiController into mainController - Replace with improved
        versions...
23         IMainController mainCtrl = new MainController(socketHandler, weightController);
24         //.init and .start could be merged
25         mainCtrl.start();
26     }
27 }
28
```
